

CSX Conrail Color Light Signals

Almost identical to NS Conrail except:

Restricting aspects come from both NS Conrail and CSX Standard. In addition to the R/R/Y and R/Y (high stand), and R/Y and Y (dwarf) from the NS; anything with a Lunar (from CSX Standard) is also a Restricting or in one case Restricted Proceed.

Anything with a number plate (high stand and dwarf) is Restricted Proceed like CSX Standard.

Name for Stop is just Stop, not Stop Signal like the NS.
